Ok now I see the issue. I can have someone else review so just let me know.

I told John Curry that I would peer review but, since there was a note that you had volunteered and I am hung up with the mercury analyses, I thought that I should take these two to you. I'll be happy to do the later ones - I just don't want to hold these up. However, if it should be necessary for me to do these, just please let me know. Thank you.
